

Portable Bluetooth® Hands-Free Systems for Car, Office or Home.

Blaupunkt looks back on long years of experience in the development of Bluetooth® solutions. Many different generations of car radios and interfaces have been developed on the basis of Bluetooth® technology.

In the meantime, Blaupunkt hands-free systems have become so popular that their use is certainly not limited to in-vehicle applications. Whether at work, sports, doing housework or in the garden, having your hands free to do more when using the telephone is becoming more and more a priority with many users. Blaupunkt recognized this trend early and will now launch an extensive model series onto the market for the first time.

In contrast to conventional hands-free systems as additions to car radios, the BT Drive Free 112, 211, and 311 devices are completely independent and fully portable. Unlike solutions with headphones, these handy units, equipped with a speaker, microphone and powerful rechargeable battery, are also ideal for use in telephone conferences. A Bluetooth® solution has many advantages. The BT Drive Free devices can be used universally, i.e. they no longer need a cell-phone adapter for the existing equipment. The cell phone can also be anywhere in the car without you having to have direct access to it, in a jacket pocket, for example. Blaupunkt Bluetooth® hands-free systems: Excellent sound quality with D.S.P. optimizes noise and interference suppression. Echoes, interference and noise are all effectively reduced to an absolute minimum.

Put any cell phone in its place.

These Bluetooth® hands-free systems were specially developed for users who want to use their cell phones while driving without having to take them out of their pockets or handbags.

BT Drive Free 311

The BT Drive Free 311 is equipped with an LCD display to show phone numbers and caller names. The device supports text-to-speech in five different languages as well as phonebook synchronization with your cell phones. You get voice messages on the device status and hear the name or number of an incoming call. Thanks to advanced D.S.P. technology for echo and noise suppression, the BT Drive Free 311 affords outstanding hands-free voice quality and ensures convenient, safe use of the telephone while driving.

Weight	80 g
Size	115 x 55 x 18 mm (L x W x H)
Bluetooth® specs	V2.1 + EDR (Enhanced Data Rates)
Frequency range	2.4 GHz spectrum
Multifunction button	Pairing, call accept, call end, call deny, redial, microphone mute, call forwarding
Battery	Rechargeable Li-Ion, 3.7 V, replaceable
Call time	Up to 10 hours
Standby time	Up to 480 hours
Charging time	2 to 3 hours
Range	Up to 10 meters

BT Drive Free 211

The BT Drive Free 211 is a combination of a Bluetooth® headset and a Bluetooth® hands-free device. The docking station is very easy to install in the vehicle, on the sun visor, for example. The headset can also be used separately for calls, independently from the docking station. The BT Drive Free 211 features outstanding hands-free voice quality and ensures convenient and safe use of the telephone while driving.

Weight	95 g
Size	110 x 58 x 23 mm (L x W x H)
Bluetooth® specs	V2.1 + EDR (Enhanced Data Rates)
Frequency range	2.4 GHz spectrum
Multifunction button	Pairing, call accept, call end, call deny, redial, microphone mute, call forwarding
Battery	Rechargeable Li-Ion, 3.7 V, replaceable
Call time	Up to 2 hours (headset), up to 15 hours (docking station)
Standby time	Up to 80 hours (headset), up to 400 hours (docking station)
Charging time	Approx. 1 hour (headset), approx. 3 hours (docking station)
Range	Up to 10 meters

BT Drive Free 112

The BT Drive Free 112 is handy as a conference or office device and can also be used in the car. Thanks to an improved microphone system and D.S.P. technology for echo and noise reduction, this device provides for outstanding voice quality.

Weight	60 g
Size	116 x 45 x 15 mm (L x W x H)
Bluetooth® specs	V2.1 + EDR (Enhanced Data Rates)
Frequency range	2.4 GHz spectrum
Multifunction button	Pairing, call accept, call end, call deny, redial, microphone mute, call forwarding
Battery	Rechargeable Li-Ion, 3.7 V, replaceable
Call time	Up to 15 hours
Standby time	Up to 500 hours
Charging time	Approx. 3 hours
Range	Up to 10 meters
